

INSUduct™

The Green and cost effective solution to water pipe protection. Made from recycled materials, INSUduct™ is the ONLY pipe insulation system that can be used externally.

**pipe not supplied with INSUduct*

Why use INSUduct™?

- Saves time & money - facilitates the renewal of water services (eg lead pipe replacements) in two hours or less.
- Compliant with all water supply guidelines
- Fully compliant with DETR guidelines and Water Regulations for frost protection
- Can "climb" to first or second floors externally
- Can accommodate 2 x 25mm PE pipes as standard or 3 x 25mm pipes or 1 x 32mm pipe with minimal action
- Bespoke INSUduct can be fabricated to your specification

INSUduct can be used with or without Groundbreaker for:

- New homes
- Urban Regeneration
- Park homes & caravan sites
- Water service repairs
- Lead pipe replacements
- Rainwater harvesting and grey water schemes.
