0626

The following range of water fittings has successfully completed mechanical testing against the UK Regulators' Specification for water fittings.

The non-metallic materials used in the range has also been assessed against the requirements of BS 6920 for non-metallic materials in contact with potable water.

The range of water fittings describes on this certificate therefore meets the requirements of Regulation 4 of the Water Supply (Water Fittings) Regulations 1999 in England and Wales, the Water Supply (Water Fittings) (Scotland) Byelaws 2014 and the Water Supply (Water Fittings) Regulations (North Ireland) 2009.

Company: Steve Leigh & Associates

Address: 3 Fairways, The Common, Stuston, Suffolk, IP21 4AB

Description: `Groundbreaker Mk3` water meter box for installation upon the external wall of a premises. The boxes incorporate a concentric water meter manifold (plastic) with screw down stop valve, single check valve (suitable for backflow prevention up to fluid category 2) and compression fittings for use with MDPE. The boxes also incorporate internal insulation.

Size: 25mm plastic pipe compression

Models: Groundbreaker Mk3

Marking: `Groundbreaker` located at base of the outer shell.

Maximum working pressure: 12.0 bar

Maximum operating temperature: Cold water use only

Installation Requirements and Notes (IRN) R001, R415, R430

IRNs are published by the Water Regulations Advisory Scheme to ensure suitable water fittings are installed in accordance with the requirements of Regulations and Byelaws. For further information visit www.wras.co.uk.
